

Pronto

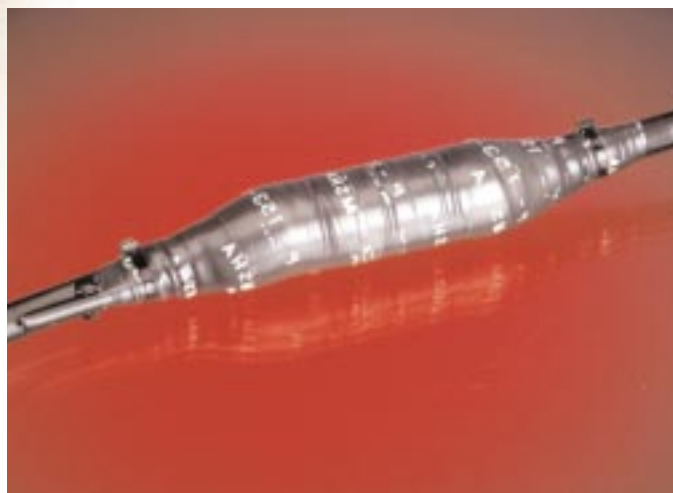

Watertight Closure System

A waterproof splice closure system that's ideal for quick and easy installation in all construction applications.

The Pronto Closure resists water migration into both cable and splice by force encapsulating the joint. Self-vulcanizing tape, wrapped with hand tension, becomes a homogenous mass and completely covers the splice while applying compression to the filling compound. A special wrap of UV resistant tape covering provides a tough abrasion resistant covering while an aluminum canister may be applied over the splice for additional mechanical protection.

Features

- Self-vulcanizing tape wrap creates a waterproof interior for splice protection.
- UV tape provides a tough, abrasion resistant, sheath covering.
- Does not require the use of heat or flame.
- Force encapsulating technique creates an effective moisture block against water migration.
- May be used with an aluminum canister.
- Kit includes all components necessary for completing a splice.
- No special tools required for installation.

Applications

- Watertight - Underground - Aerial - Vault.

Sizes

- Models to hold from 10 up to 1,800 copper conductor splice pairs.
- Flexibility in cable entry configurations.

Dimensional Data

MODEL NUMBER	INTERIOR DIAMETER Inches (mm)	CABLE SHEATH OPENING Inches (mm)	PAIR CAPACITY
1AA	1.70" (43)	4.0" (102)	10-30
1A	2.44" (62)	6.0" (152)	40-100
1B	2.44" (62)	9.0" (228)	150
2B	3.62" (92)	17.0" (430)	200-300
3A	4.80" (122)	17.0" (430)	400-600
4A	5.90" (150)	19.0" (482)	900
5A	7.87" (200)	20.0" (508)	1200-1800
