

PR-821

Duct Sealing Compound

An expandable blocking compound used for plugging ducts in manholes or telecom entrance facilities.

PR-821 Expandable Blocking Compound is free polyurethane that expands eight times in volume to create a dense foam used to plug duct entering manholes or telecom entrance facilities.

All components necessary for making a permanent duct plug, including foam strip and protective gloves, are included in each compound kit.

Features

- Clean, convenient packaging.
- Available in four gram kit sizes.
- All components included in kit.

Applications/Sizes

- May be used to plug any telecom duct.
