

2-Line Station Protector Box

A multi-service box that may be used for terminating up to 2 drop wire pairs or adding other electronic enhancements to the line.

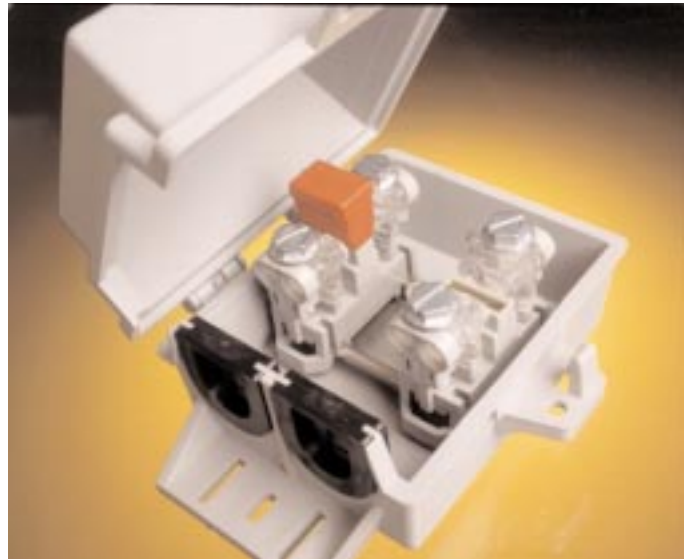

WPT two-line multi-service terminal boxes offer a simple, compact solution when terminating either one or two drop wire pairs. Each unit may be locked against unauthorized entry while rubber grommets protect the contents from dust, water and other foreign objects. Several mounting holes are provided for maximum flexibility and easy installation.

Features

- Molded from impact resistant, chemical resistant plastic.
- Easy access for terminations.
- Small in size, lightweight.
- Simple hand tools and minimum skills required for installation.
- Minimum twenty year life cycle.

Applications

- For mounting to walls, or wood, metal and concrete poles.
- May be used to house and protect terminal blocks, protection modules and a wide variety of electronic telecom components.

Sizes

- For housing up to two terminal blocks.
- May be ordered with or without IDC terminals.

Cricket Terminal Blocks with interchangeable bridge module and standard 5-pin footprint to accommodate gas tube, hybrid or solid state protection.

Termcon Terminal Blocks with 3-pin footprint in an always closed position - no bridge module required to complete circuit.
