

Termcon Terminal Block

A gel filled IDC module designed for mounting in housings on standard DIN rails.

The WPT Termcon module is quickly and easily installed on standard DIN rails and therefore may be added and removed on an "as needed" basis. Protection modules, with three pin footprint, may be supplied to customer specifications.

Features

- Insulation displacement (IDC) type connections.
- No wire stripping required.
- No special tools required for installation.
- 3-pin footprint in always closed position - no bridge module required to complete circuit.
- Totally encapsulated wire connection points provide complete protection from all environmental conditions.
- Visually inspect the integrity of all wire connections.
- Reusable - wires may be removed and reinserted without affecting IDC contacts or integrity of seal.
- Will permit up to 100 wire terminations on both line and subscriber side connections.
- Rugged design and construction.

Applications

- Designed for mounting on standard DIN rails.
- DIN rail doubles as an earth point.

Sizes

- One-pair modules.
- Will accept 0.4 - 1.0mm (26-18 gauge) conductors.
